

# Adding Fractions Using Visual Models

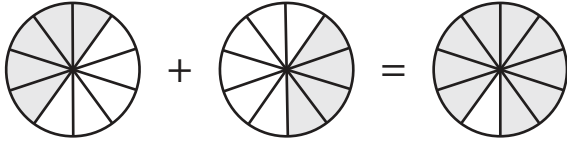

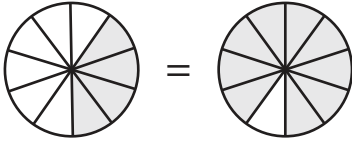

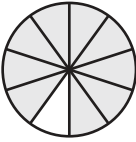

A) Observe each fraction model and complete the addition equation.

1)  +  = 

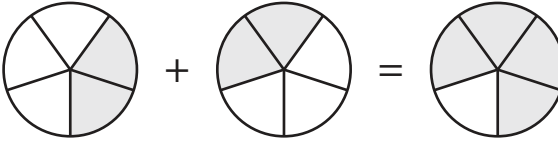

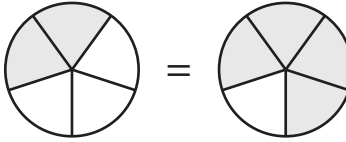

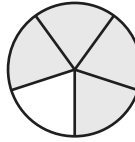

$$\frac{3}{6} + \frac{2}{6} = \boxed{\phantom{00}}$$

2)  +  = 

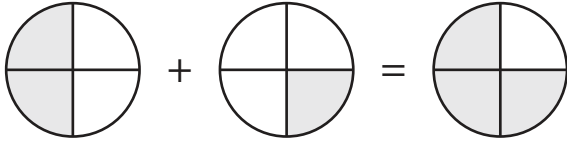

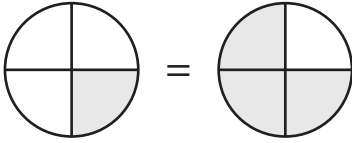

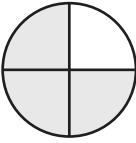

$$\frac{8}{12} + \frac{1}{12} = \boxed{\phantom{00}}$$

3)  +  = 

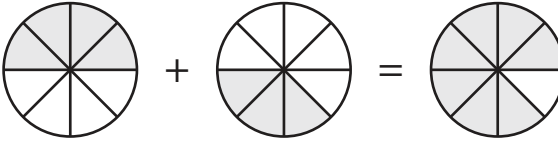

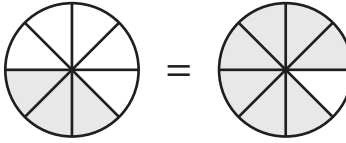

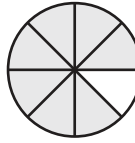

$$\frac{5}{10} + \frac{4}{10} = \boxed{\phantom{00}}$$

4)  +  = 

$$\frac{2}{5} + \frac{2}{5} = \boxed{\phantom{00}}$$

5)  +  = 

$$\frac{2}{4} + \frac{1}{4} = \boxed{\phantom{00}}$$

6)  +  = 

$$\frac{4}{8} + \frac{3}{8} = \boxed{\phantom{00}}$$

B) Which of the following models represents a pair of fractions that sum up to  $\frac{8}{12}$ ?
