

Reading and Interpreting Double Line Graphs

As part of a science experiment, Tina is growing two plants. She uses fertilized soil for plant 1 and unfertilized soil for plant 2. The line graph shows by how many inches the plants grow every week. Read and interpret the graph to answer the questions below.

- 1) In which week did Plant 1 grow the most? _____
- 2) How much more did Plant 1 grow than Plant 2 in the 7th week? _____
- 3) In which week did Plant 2 grow the most? _____
- 4) In which week did Plant 2 grow 0.5 inches more than Plant 1? _____
- 5) How many inches did Plant 1 grow between the 3rd week and the 6th week? _____
