

# Decomposing 4-Digit Numbers

Decompose each number in different ways and fill in the missing numbers.

1)  $2,753 = \underline{\quad\quad}$  thousands +  $\underline{\quad\quad}$  hundreds + 5 tens + 3 ones

$2,753 = \underline{\quad\quad}$  hundreds +  $\underline{\quad\quad}$  tens + 3 ones

$2,753 = \underline{\quad\quad}$  tens + 3 ones

$2,753 = \underline{\quad\quad}$  ones

2) 5,

5,

5,

5,

3) 1,

1,

1,

$1,927 = \underline{\quad\quad}$  ones

4)  $3,834 = 3$  thousands +  $8$  hundreds +  $\underline{\quad\quad}$  tens +  $\underline{\quad\quad}$  ones

$3,834 = \underline{\quad\quad}$  hundreds +  $\underline{\quad\quad}$  tens + 4 ones

$3,834 = \underline{\quad\quad}$  tens + 4 ones

$3,834 = \underline{\quad\quad}$  ones
